A Practitioner's Guide to Judicial Review in the Criminal Justice System and Related Areas - General Editor Piers Von Berg

There are lots of practitioner texts dealing comprehensively with judicial review, and there are a few that cover, somewhat fleetingly, aspects particular to criminal law. There are however few that combine in one text the level of detail required to deal with a criminal law related judicial review from start to finish. This book fills that gap.

The book starts with the basic principles of judicial review, and then goes on to deal with specific areas in great detail: Policing, Crown Prosecution Service, Courts, Prisons, Coroners and other statutory bodies. Following that a number of specialist areas are covered, once again in great detail: Children, Young Persons and Juveniles, Mental Health, Extradition and EU law. The book ends with all important commentary on legal aid funding and costs. There is extensive referencing and analysis of case law with all recent authorities covered in full.

The book weighs in at over 700 pages, and unusually few of those are wasted on what is often unnecessary appendix material. Instead the reader is treated to both a scholarly and practical analysis of the underlying principles, a combination that few authors manage to achieve.

This book is an essential addition to any criminal law library. But there is a shocker, the price. A hardback book, 700+ pages of this quality would normally impact heavily on your wallet. Not this one, it is published by Hart Publishing at £65, which represents quite phenomenal value for money. Other publishers should take note. Don't buy it from a bookshop, order from the publisher, they deserve the commission. [Buy here](#)
